California Proposition 65 (Prop 65)

The materials that Hammond Power Solutions uses in its products could contain 1 or more substances listed in the "Proposition 65 List", pursuant to **California's Safe Drinking Water and Toxic Enforcement Act of 1986**, commonly referred to as **Proposition 65 or Prop 65**.

This Act identifies a list of chemicals which the State of California's risk assessment process has determined to present a risk of cancer, birth defects, or other reproductive harm. The full Prop 65 chemical list can be found at: <https://oehha.ca.gov/proposition-65/proposition-65-list>.

The substances, if contained within materials, would be at very low amounts and not exceed established No Significant Risk Levels (NSRLs) or Maximum Allowable Dose Levels (MADLs).

Hammond Power Solutions Inc. is committed to providing safe and high-quality products to our customers. We will continue to monitor the Prop 65 list for new additions and compare these to the materials used in our finished products.

A handwritten signature in black ink, appearing to read "Jeff Perry". The signature is fluid and cursive, with the first name "Jeff" and last name "Perry" clearly distinguishable.

Jeff Perry
