## **Per- and Polyfluoroalkyl Substances (PFAS)**

Hammond Power Solutions confirms that our products are free from the PFAS chemicals which are listed under the EPA [PFASSTRUCTV5](#) and EPA [PFASDEV](#) lists. In instances where we previously utilized certain PFAS chemicals, we have proactively substituted them with environmentally friendly alternatives. These substitutions align with our commitment to sustainability and the protection of both human health and the environment.

We are committed to continuous monitoring of PFAS regulations and updating our practices to ensure ongoing compliance with all applicable requirements.
