

# New

## Now Offering ***Factory Installed*** **Infrared Windows**

Infrared windows are now available as an option on HPS Energy Efficient Distribution Transformers. This feature allows easy infrared thermal inspections of the transformer in critical power applications without the need to open or remove enclosure panels. Each enclosure is equipped with two 3 inch diameter windows on the cover panel.

### Benefits

#### **Improved Safety**

Mitigates the risk of injury to electrical workers who perform thermal inspections.

#### **Cost Effective**

Pre-installed infrared windows reduce installation effort and time.

#### **Downtime Reduced**

The need to de-energize a transformer in order to perform inspections is decreased. The infrared windows allow visual inspections to be conducted easily.

#### **Convenient**

Immediate view of inside the enclosure without the need to remove any panels.
