- Standard Type 4 enclosure suitable for indoor or outdoor applications
- Removable hinged door allows for easy access to terminations
- Standard integral floor and wall mounting brackets on select kVA's for faster installation
- Optional breather drains ensure that any moisture build-up due to condensation is easily eliminated without compromising Type 4/12 enclosure integrity (standard for HPS Titan X)

Temperature Code* - Titan N:

- Class 1, Zone 2, Group IIC, T3
- T3A (115°C rise units) at 40°C ambient
- T3C (80°C & 95°C rise units) at 40°C ambient
- 80°C and 95°C rise units are suitable for 50°C ambient
80°C rise at 50°C ambient maintains T3C performance
95°C rise at 50°C ambient maintains T3A performance
(95°C rise unit only available in three phase)

* For three phase units only

Installation made fast & easy!

The improved three phase enclosure design allows for quick and easy installation. By simply loosening the screw clips on the side of the enclosure, installers are able to access the terminations. The removable hinged door and front accessible terminations allow for easier cable installation in confined spaces.

Testing

All HPS transformers are tested at HPS prior to shipment. They must meet very stringent quality criteria prior to release.

Advantages of IECEx Certification*

Available with HPS Titan X

There is an increasing need for installation efficiency and safety in industrial automation and hazardous locations. Equipment, especially electrical, and their use in these areas are covered by a wide range of IEC Standards and are generally highly regulated.

The use of the IECEx Conformity Assessment System and its Schemes offer some key advantages:

Enhanced Safety

Equipment, installations and systems are manufactured, operated and maintained in compliance with IEC International Standards.

Simple Online Verification

All issued IECEx Certificates are available for verification on www.iecex.com or on the IECEx app.

UN Endorsement

The United Nations, via UNECE, has endorsed IECEx as the internationally-recognized certification system for promoting the improved safety of equipment, services and personnel associated with devices, systems and installations used in Ex areas.

Cost Reductions

IECEx certification reduces the need for additional testing and certification which can lower costs and streamline processes.

- Efficiencies are approximate, and not guaranteed
- All efficiencies are based on 75°C reference temperature
- Applies only to 115°C rise, with the exception of 2 & 3 kVA
- *Items from 15-75kVA meet the current minimum efficiency levels in North America (DOE 2016 & NRCAN 2019) for ventilated transformers. Note that these efficiency levels are not required for this non-ventilated offering.
